ZigBee SDK for V850ES: TK-850/SG2+UZ

【Price】US\$1300.00

Please inquire for the price of training packages or version upgrade.

We also provide customizations to the protocol stack on request.

© Notes

- There are 3 versions of ZigBee SDK, namely, ZigBee SDK for 78K0, ZigBee SDK for V850 and ZigBee SDK for 78K0R. Each version costs US\$1300.00.
- The ZigBee SDK does not include any hardware.
- The TECERA Technology INC. develops the devices on which the ZigBee SDK works. Such devices include 8/16/32-bit MCU's and motherboards.
- The ZigBee SDK does not include a compiler or development tool which is necessary for compiling the C programs. Please consult NEC Electronics for detail.

This total ZigBee network solution integrates the MCU from NEC Electronics, the RF from UBEC and the SDK from Skyley Networks.
